Rating: 😊 very good**Category:** [Body Care](#) -> [Body Cream/Oil](#)

A high quality, natural organic oil for the performance of quality cosmetic procedures, it delays skin from aging, and makes it firm and glowing.

Sesame seed oil is wonderful for softening and nourishing the skin, improving its tone and elasticity, as well as for preventing infections and skin dryness and peeling. The oil contains many microelements (zinc, calcium), vitamins E and A, and it also has a wonderful balance of polyunsaturated fatty acids and natural antioxidants (of which sesamole is the main one). It has the power to penetrate the layers of the skin deeply, softening and improving the skin's biochemical processes and preventing the initial signs that your skin is aging. This oil has a gently relaxing, refreshing effect.

You have analyzed this cosmetic product on 2015-10-26.
